

Welcome to your StudyStash Dashboard! Enjoy seamless access to all features, course materials, and progress tracking. For assistance, our team is here to help. Happy Contribution! Study-Stash Team.

Earnings

**\$ 500**

Questions Answered

**100 Qns**

Renewal Time

**15 Days**

© 2023 Study-Stash, All Rights Reserved

Questions Answered should be changed to **“Email Qns Received”**

Here we shall need to send an email containing questions to the users who have subscribed. So, I need you to track each email sent to the user. For example, if the user has received two emails since when he subscribes it should display “2” not 2 Qns. We are tracking email questions sent to the user not questions in the email.

### Earnings

Here we shall be wanting to display how much the user has got since he joined study-stash.com, once the user submits back to use the answers of the questions, we sent him he will be awarded a certain amount that can keep changing. So, when we pay him, we shall need the Earnings section to be updated.

Here is an example we shall be sending him the email containing the questions and, in that email, we shall be informing him that upon successful submission of the email you will be awarded this amount \$... (The amount will vary according to the questions). Mr. Yevhen, I don't know how are you going to set that but that's the logic I have.

### Renewal Time

This should be displaying time remaining for the user to pay for the next membership. The format is in Days.

### Admin section

#### "Email Qns Received"

We need to have 5 admins with different privileges on their on the system

Admin 1(Root Admin), should be able to do the following

- a/. Deactivate and activate users accounts
- b/. Have full access to the system features.

#### **Admin 2, (Activities related to emails only)**

- a. Send emails to the users  
Whether it's, newsletters, product deals on the study, any email.  
**Note:** He should choose how he should appear in the user's inbox,  
Meaning that he can send emails as [no-reply@study-stash.com](mailto:no-reply@study-stash.com), [support@study-stash.com](mailto:support@study-stash.com), and  
many others so, you will enable him to choose how he can send the email.
- b. Enable him also to create the "second Admin 2", who has access to email issues only.  
"Admin 2" and "second Admin 2" should be doing the same work

#### **Admin 3, "Accountant" only**

- a. Should be dealing with activities related to tracking who has paid or not paid for the membership,
- b. Should be also able to track who has been paid or not paid for the questions he answered.

#### **Admin 4, Activities related to dynamic content on the web app.**

- a. Uploading of the partnership logo and names
- b. And any other dynamic content as I explained on the first reference

#### **Admin 5, Manages Study-stash store**

- a. Study-stash's-store product uploads. (Setting price, name etc...)
- b. Billing information and other issues related to the store,  
Tracking how has paid for the product  
Access to the billing information not credit cards and debit cards or any other information
